50X1-HUM

1. Extensive workshops of the Assembly and Repair Works of the Automobile Industry (zakłady montazowe przemyslu samochodowego) are located southeast of Wroclaw at Jelcz (Jeltsch). Approximately 10,000 workers are employed there, the majority of them being prisoners. Warszawa (Pobieda) and Skoda cars, and Star trucks were assembled at this installation.
2. It is intended that by 1955, these workshops will produce the bodies and engines for a new type of Polish car. Anti-cipating the future expansion of the works, construction of new living quarters on the premises started in the summer of 1953, for workers living in the vicinity who are at present being brought to work by motor vehicles.
3. The prisoners receive a small payment from which board and lodging costs are deducted; the remainder, except for pocket money for spending at the canteen, is entered in a savings book held by the prisoner.
4. The majority of the men are housed in the works' area; the remainder live in neighboring settlements.
